Projects

Local Swift Market   Aug 23 – Oct 23

- **Description**: This groundbreaking e-commerce platform crafted to actively champion and cater to the diverse needs of local businesses for 3 districts. It seamlessly facilitates and streamlines the user experience, ensuring a user-friendly interface that empowers shoppers.
- **Role**: Led the development of the front-end for the e-commerce website role in creating an engaging and user-friendly interface.
- HTML for content structuring, CSS for styling and layout, and JavaScript for interactive features had resulted in a well-integrated front-end solution that had significantly contributed to the success of the e-commerce platform

Personalised Vacation Planning and Exploration app   Jul 24 – Ongoing

- **Description:** Our team had crafted a personalized vacation app, tailored unique itineraries and offered detailed guides, bookings, and local attractions for effortless planning across 300 cities.
- Crafted the backend with ML for recommendations, built the frontend using integrated APIs, tested rigorously, deployed on the cloud.

Co-curricular

- **Technical Skills**: Python, C/C++, Java, MYSQL, HTML, CSS, Front-end development, Data Structure, Object Oriented Programming.
- **Certifications & Training:** Python Essentials, VITyarthi, Apr 23
  NPTEL Cloud Computing Certification(IIT Kharagpur), May 24
